+44 7534 578468

W3, London

## Education

---

**Imperial College London** | MSc Business Analytics and AI *London, UK* · August 2026 – August 2027

- Key Modules: Advanced ML, Supply Chain Analytics, Database Technologies, Optimisation and Decision Models

**University of Bristol** | MEng Mechanical Engineering *Bristol, UK* · September 2021 – July 2025

- 69% Upper Second Class Honours (2.1) (GPA 3.8) | Recipient of the Bristol PLUS Award, Think Big Scholarship
- First class in dissertation "Heuristic Optimisation Algorithms for Structural Health Monitoring Applications"
- Key Modules: Group Industrial Project, Engineering Management, Data Driven Modelling, Mathematics I and II

## Technical Experience

---

**Queen's Tower Exchange** | Technology Arm, Cloud Infrastructure *London, UK* · June 2026 – Present

- Architected and delivered a deterministic simulated exchange for 34 trading teams and 250 students using AI-assisted development and IaC to convert live Level 1 data across 323 equities and ETFs into synthetic L2 liquidity.
- Built a production monitoring model around managed Grafana and Prometheus, using automated reliability checks to reduce mean time to resolution across 34 student leaderboard services.

**Samaggi Samagom** | Director of Digital Services & Infrastructure *London, UK* · November 2022 – Present

- Architected a serverless AWS platform spanning Lambda, DynamoDB and Amplify to consolidate 8 digital services for 7,000 students and supporting 3 concurrent initiatives with centralised authentication.
- Integrated Amazon Q with RAG and S3-backed knowledge retrieval, enabling committee users AI-powered access to S3 documentation while reducing information retrieval and operational turnaround by 2–4 days.

**UKSSC** | Director of Technology *London, UK* · February 2025 – March 2026

- Led bespoke Vercel-hosted MERN services using REST APIs to centralising business logic in Express and MongoDB to support 12 events for 2,000 students in the UK.
- Established security controls via Firebase server-side authorisation to prevent 300 unauthorised requests per month.

## Professional Experience

---

**180DC Global** | Global Data and Insights Specialist *Remote, UK* · July 2026 – Present

- Developed a Vercel-hosted branch platform during the Monday.com migration, centralising profiles, 30 metrics of impact data and compliance records for 200+ branches to reduce reliance on fragmented workspaces.
- Scoped branch-facing IT requirements through liaisoning with 18 EMEA operations teams to translate platform needs into prioritised requirements that reduced manual support dependency and the March 2027 migration roadmap.

**Flare Network** | Time Series Analyst *Bristol, UK* · January 2025 – May 2025

- Implemented PSI-based drift monitoring with a 0.2 retraining threshold to trigger event-driven model updates while maintaining 65ms inference latency across the production forecasting pipeline.
- Built Python FX pipelines across 15+ sources, processing 250,000 daily records to improve CVar forecasting models.

## Skills and Interests

---

**Certifications:** AWS Cloud Practitioner, AWS AI Practitioner, AWS Machine Learning Engineer Associate

**Technologies:** Python (TensorFlow, PyTorch, Langchain, MLFlow, PySpark), AWS, SQL, Databases (DynamoDB, Databricks, MongoDB), R, MS Excel & Power BI, VBA, C++, W&Bs, Kubernetes, Terraform, Git, Shell

**Skills:** Cloud Infrastructure, Full stack, Software Engineering, CICD, LLM and AI Engineering, Product Deployment

**Languages:** English (C2), Thai (C2), Mandarin (B1) **Interests:**

- Dance - For 6+ years. Part of multiple professional dance crews across London including DCorps and Paradox
- Mentorship - Academic support roles as PASS Leader and Peer Mentor, Course Rep for Bristol Y3/Y4 engineering
