Professional Experience

Flare Network | Flare Time-Series Oracle (FTSO) Analyst *Bristol, UK* · January 2025 – May 2025

- Built automated data and alpha-generation pipelines for streamed FX data, deployed production web scrapers, and applied stationarity diagnostics with rolling transformations to prepare features for downstream research.
- Conducted predictive modeling over a 5-year historical window, forecasting short-horizon conditional volatility and comparing EGARCH-based ensembles against baseline LSTM and XGBoost models. Evaluated seasonality effects, tail-sensitivity, and out-of-sample stability using log-RMSE, achieving a 2.7% improvement in forecast accuracy.

KKP Financial Group | Data Science and Strategy Intern *Bangkok, Thailand* · July 2024 – August 2024

- Analysed 40 million transactions using PySpark and Databricks, building ETL pipelines and performing customer segmentation to identify high-conversion investor cohorts and inform feature inputs for a new recommender system.
- Developed valuation models for 130+ investor portfolio products, estimating WACC from capital structure and applied DCF, NPV, and IRR analyses across segmented cohorts. Translated insights into executive-level Power BI dashboards, delivering branch-level benchmarks and investor trends to senior management within a 4-week timeline.

Education

Under Review at Imperial and LSE | MSc Data Science *London, UK* · September 2026 – September 2027

University of Bristol | MEng Mechanical Engineering *Bristol, UK* · September 2021 – August 2025

- 69% Upper Second Class Honours (2.1) (GPA 3.8) | Recipient of the Bristol PLUS Award, Think Big Scholarship
- First class in dissertation "Heuristic Optimisation Algorithms for Structural Health Monitoring Applications"

WorldQuant University | MScFE Financial Engineering *Remote, USA* · October 2025 – October 2027

- Relevant Modules: Stochastic Modelling, Deep Learning for Finance, Portfolio Management, Derivative Pricing

Projects

Samaggi Samagom | Chief Information Officer SS125 *London, UK* · November 2022 - Present

- Architected a cloud-based SAM CMS infrastructure on AWS to support the UK's largest Thai student society.
- Developed applications for 7000+ members, including a custom Career portal and event management platform.

NexusKCG | MLOps Platform Engineer *London, UK* · June 2025 – Present

- Built cloud-native MLOps inference pipelines for a consultancy startup, supporting workplace strategy for 12 clients.
- Developed DBSCAN segmentation models containerised with AWS EC2 and K8, with automated monitoring.
- Translated operational KPIs into three versioned releases, complemented with A/B testing and ANOVA analysis.

Bristol Intelligent Sytems Laboratory | Researcher *Bristol, UK* · January 2025 – Present

- Researched PINN embedding SEIR with ODE constraints to infer spatio-temporal COVID-19 infection dynamics.
- Conditioned a GNN over an 8k-node mobility graph to model epidemiological propagation using PINN parameters.

Bristol Trading Society | Quantitative Analyst - Derivatives *Bristol, UK* · September 2024 – May 2025

- Engineered a real-time NLP macroeconomic pipeline integrating 20K+ financial articles to extract sentiment scores.
- Optimised TF-based deep learning MLP with C++ execution layer. Achieved 3% out-of-sample accuracy.

Skills and Interests

Skills: Python, AWS Cloud, R, SQL, MS Excel & Power BI, VBA, C++, ReactJS, Kubernetes & DevOps, Shell

Languages: English, Thai, Mandarin (Conversational)

Interests: UI/UX and Graphic Design, Mentorship, Performance Arts, Game Development
